About Us

Greeni is a business under Shubbak Al Aman General Trading LLC catering to eco-friendly solutions. At Greeni, we believe that every small step towards sustainability can make a significant impact. Our journey began with a passion for protecting our planet and a simple idea to eliminate harmful plastics to the extent possible from everyday life.

We carefully source our materials from responsible suppliers who are aligned to our vision and passion for the environment. From the moment you receive your order, you can be confident that you're making a conscious choice. By choosing Greeni, you're not just buying a product; you're supporting a sustainable future.

Vision

Our vision is to drive the transition to a sustainable future by offering a comprehensive range of eco-friendly products. Committed to eliminating plastic and harmful materials, we aim to build a network of responsible suppliers and create a market where sustainability is the norm helping to protect our planet. With a focus on quality, integrity, and community, we strive to become the preferred trading partner for eco-friendly solutions.

Mission

Our mission is to provide high-quality, sustainable alternatives to single-use plastics and other harmful materials by connecting our customers with eco-friendly products that protect the environment. Through responsible sourcing, education, and customer engagement, we aim to reduce environmental impact while fostering a culture of sustainability and responsible consumption.

Together, we can reduce plastic waste and create a healthier planet. Join us to be part of the solution rather than the problem.

Explore our eco-friendly solutions today and make a difference.

Consumers Health Nature

Our Eco-Friendly disposable products are aesthetically pleasing products so that customers can enjoy food without any negative impact on the taste & Health as plastic products do. Due to Durability these products are gaining popularity among food, health and nature conscious peoples.

Paper Straws vs Plastic Straws

Paper Straws

1. Paper straws are biodegradable.
2. Paper straws take less amount of time to decompose.
3. Switching to paper straws will reduce the use of plastic straws.
4. Paper straws are safer for marine life.

Plastic Straws

1. Plastic straws remain on Earth forever.
2. Plastic straws take 200 years to decompose.
3. 500 million straws are disposed off in US each day which ends up in the ocean.
4. 90% of the marine animals have ingested plastic.
5. Plastic straws require a great amount of non renewable resources.

**By 2050,
there will be more plastic than fish in the oceans. Make your choice!**

ESG

ENVIRONMENTAL SOCIAL GOVERNANCE

Compostable and biodegradable products, such as those made from sugarcane bagasse or paper, drive sustainability and support Environmental, Social, and Governance (ESG) goals across all dimensions. Here's how they contribute to ESG objectives:

Environmental (E)

Compostable and biodegradable products offer a sustainable alternative to conventional plastic and non-degradable materials. Made from renewable resources like bagasse or paper, they produce lower greenhouse gas emissions and reduce the overall carbon footprint. These products decompose naturally and turn into non-toxic components when composted, minimizing landfill waste and supporting a circular economy model.

Social (S)

Adopting compostable and biodegradable products reflects a commitment to environmental stewardship, aligning with the growing consumer preference for sustainable practices. This decision can enhance brand reputation and strengthen relationships with customers, employees, investors, and regulators, demonstrating a commitment to sustainability and social responsibility.

Governance (G)

Increasing environmental regulations encourage or mandate the use of compostable and biodegradable materials. By using these products, businesses meet legal requirements, enhance their governance practices, and show accountability in environmental compliance, contributing meaningfully to ESG commitments.
